📍 Saudi Arabia

Introduction

I'm a **PhD student in Computer Science**, working with Prof. Marco Canini at SANDS Lab, **KAUST**. I'm working on **Agentic Systems**, with a focus on **AI Scientists**, autonomous systems for scientific discovery. I built **idea2paper.org**, a *Research-as-a-Service* system that turns a research idea into a full paper. I recently started working on **AttentionHub.org**, an Agent-Native knowledge library for AI Scientists. Previously, I worked on distributed machine learning systems: model compression, KV-Cache compression, and efficient communication.

I am deeply **curious** about technology and love building products. I am drawn to the frontier and learn fast. I am a strong communicator, fluent in **Chinese and English**, professionally and in daily life.

Education

January 2023 – Present	📖 Ph.D. student in Computer Science , KAUST, Saudi Arabia. GPA = 3.87/4.0
August 2021 – December 2022	📖 Master of Science in Computer Science , KAUST, Saudi Arabia. Dean's List Award GPA = 3.88/4.0
October 2020 – October 2021	📖 Master of Science in Applied Computational Science and Engineering , Imperial College London, UK. Distinction Degree
September 2016 – June 2020	📖 Bachelor of Engineering in Computer Science and Technology , Shandong University, China. Outstanding Student Scholarship & Outstanding Student Leader Scholarship GPA = 89.34/100

Internships

September 2026 – December 2026	📖 AI Researcher , WILL Lab (WizardQuant), Shanghai, China. Post-Training Team Agent self-improvement.
September 2023 – March 2024	📖 Research Intern , Microsoft Research Asia, Beijing, China. Supervised by Dr. Changho Hwang Efficient GPU communication for distributed AI tasks.
May 2022 – August 2022	📖 Research Intern , IST Austria, Vienna, Austria. Supervised by Prof. Dan Alistarh TopK compression with efficient CUDA-based threshold selection.
August 2019 – November 2019	📖 Engineering Intern , Tencent Cloud, Shenzhen, China. Tencent international website backend development by GoLang.
June 2019 – August 2019	📖 Research Intern , The University of Western Australia, Remote. YOLO-based splash detection of Western Australia's coastal highway by Python.

Miscellaneous Experience

Teaching Assistant

2025 Spring	KAUST CS398 Graduate Seminar
2022 Fall, 2024 Fall, 2025 Fall	KAUST CS240: Computing Systems and Concurrency
2023 Spring	Saudi Ministry of Interior Training Program CS229: Machine Learning
2022 Summer, 2023 Summer	UESTC&KAUST Summer Camp

Seasonal Programs

2025 Summer	PUMPS+AI Summer School, Barcelona Supercomputing Center, Spain.
2019 Summer	Summer Research Program, The University of Western Australia.
2019 Winter	Robotics & AI Winter School, Imperial College London Hamlyn Centre.

Leadership

2024-2025	KAUST Graduate Student Council Representative (12/1683).
-----------	--

Skills

AI Agent	Claude Code, OpenHands, Agent Loop, State Management, Memory, Context Engineering, Skills, Sandbox Execution, Long-horizon Automation
Programming Languages	C++/CUDA, Python/PyTorch, GoLang
	Chinese (Native), English (Professional)
